PROFESSIONAL EXPERIENCE

NILL

PROJECTS

Software house website:

• This is the continued project In which a full website having the communication way

between customer and client is going to build. We are using HTML, CSS, and Bootstrap

frame work. .

Template Image recognition using (Evolutionary Algorithm):

It is build using Python. In which template (part of image) is searched in few attempts

using evolutionary algorithm instead of complete iteration over big image. We use KNN,

ANN and also CNN for this purpose in the course,Artificial Intelligence.

ADDITIONAL EXPERIENCE

-> I have been ambassador of our class for a mega event "Cultural Day", dated 1st march,2020.

-> Act as finance manager during this event to purchase things for cultural stalls.

-> I am working in education wing of a society named Namal Society for Social Impact (NSSI) for

last two years,where I taught Maths and English to the FSc students.

HONORS & AWARDS

I got merit scholarship at Namal University for my BS Computer Science studies.
